Pilot Point Dewberry Farm

Grower of

High Grade Berry Plants and General Line of
Nursery Stock. Fall and Spring 1927 and 1928

Dewberries

Austin Dewberry most widely known and grown of any Dewberry in America, originated in Pilot Point in 1889.

LUCRETIA DEWBERRY—Originated at Beverly, Virginia, at the close of the Civil War. Strong brier and heavy bearer. Very large Jet black berry. Price of both plants 50c per dozen, \$1.75 per hundred, \$12.50 per thousand.

Austin Thornless Dewberry, equal to old Austin in every respect except no thorns to bother you. Price \$4.00 per hundred.

Blackberries

DALLAS—Very vigorous, drooping thorny. Productive, large and fine, very valuable market berry.

ROBISON—Very vigorous upright brier, prolific uniformly very large, best quality. Sells at highest market price. Originated by Willard Robison of Cisco, Texas.

McDONALD BLACKBERRY—A cross between the Blackberry and Dewberry. Ripens about the 10th of May. All varieties 60c per dozen, \$2.00 per hundred, \$15.00 per thousand.

PRICE'S WONDER BLACKBERRY—My own introduction. Strong brier with drooping branches, very fine, large sweet berry. Ripe last of May. \$4.00 per hundred.

Grapes

CONCORD—The old reliable commercial grape of the world, large black grape and sure bearer. Plants 25c each, \$2.00 per dozen, \$10.00 per hundred.

MOORE'S EARLY—Very large black grape, heavy bearer, ripe 15th of July. Same price as Concord.

WHITE RUBY—My own introduction, excellent white grape, resembling Niagra, very sweet and a heavy bearer. Ripening last days of June, 25c each, \$2.50 per dozen.

Fruit Trees

PEACH—Elberta (July), May Flower (May), Mamie Ross, Carman, Barry Cling (June), Mixon Cling (July), Augbert or August Elberta.

PLUMS—America, Botan, Wickson and Burbank (June), Winnsboro Red (May). Compass Cherry Plum. All peach 30c, and Plums 35c each.

EARLY GOLDEN—Apricot, 40c each.

PEAR—Keiffer and Garber, 40c each.

HICKS—Ever-bearing mulberry, 40c each.

Shade Trees

SYCAMORE—8 feet 75c. 6 feet 50c.

Weeping Willow, 6 feet 30c. Stuart Paper Shell Pecan, 2 to 3 feet \$1.00. Magnolia Fig, 2 feet 25c.

Monthly Roses

TWO YEAR BUSHES

RED—Etoil De France, Red Radiance, Edward Mawley.

WHITE—K. A. Victoria, White American Beauty, Maman Cochet.

PINK—Paul Neyron, Pink Radiance.

YELLOW—Lady Hillington, Luxumburg.

CLIMBING ROSES—White Kaiserine, A. V. Red Meteor.

All Roses 35c each. \$4.00 per dozen.

Shrubs and Evergreens

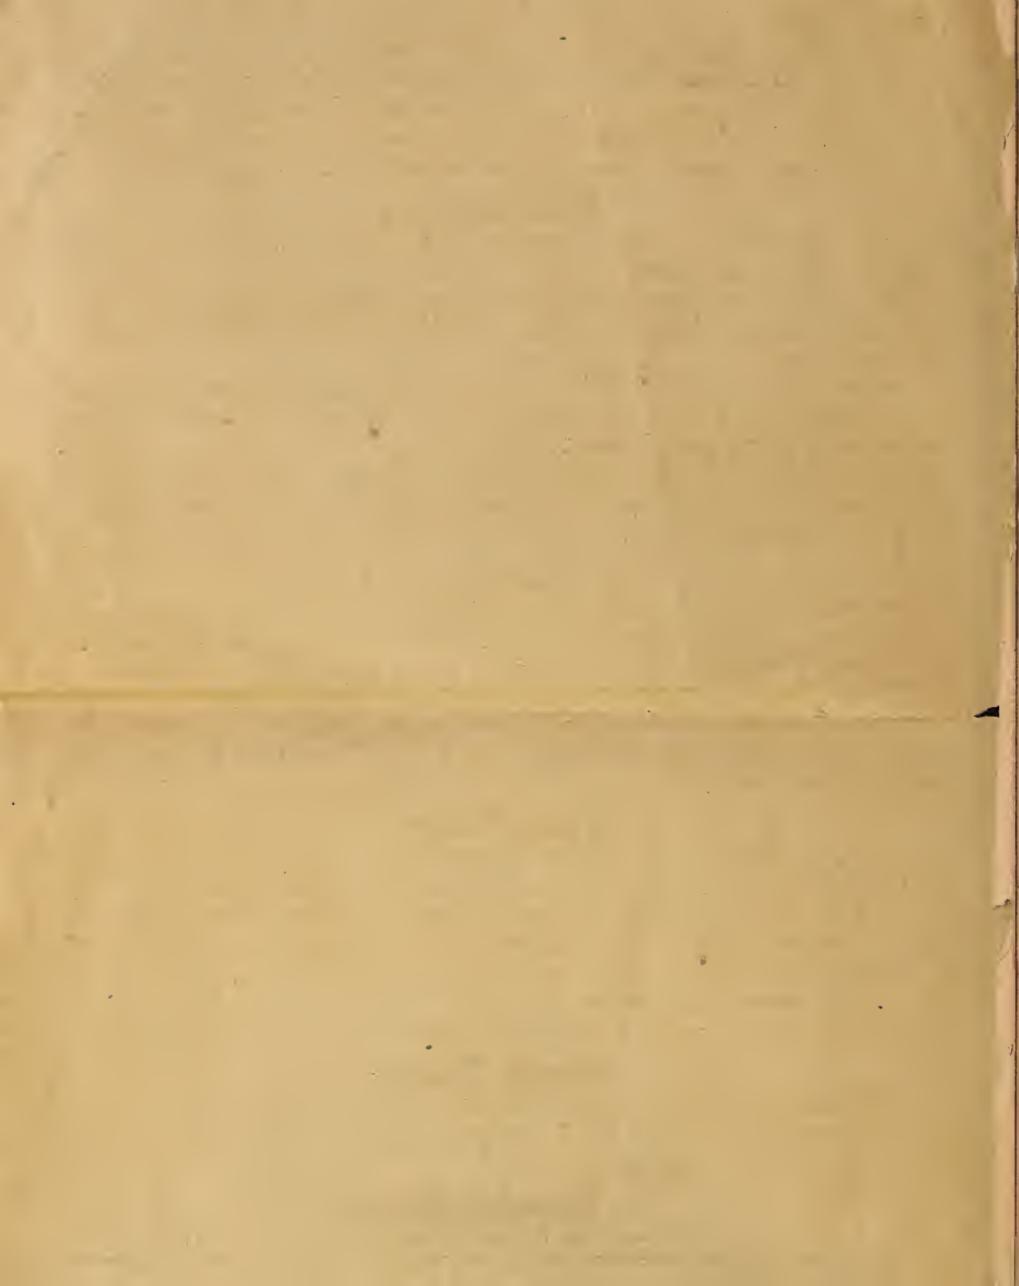

Baker Arbor Vitea, 15 inch, 75c each; 3 feet \$1.50 each. Silver Cedar, 3 feet each \$1.00. Watermelon Red Crape Myrtle, 18 inch each 35c.

Spirea Van Houtte, 18 inches, each 35c. Amoor River Privet, 2 year, each 15c, \$10.00 per 100; 1 year 10c each, \$8.00 per hundred. Cape Jasamine, 18 inches, each 75c. Euonymus Japonica, 18 inches, each 75c. Pyrimidal and Golden Japonica 50c each.

PRICE'S WONDER BLACKBERRY

A friend of mine called my attention to this Blackberry in 1920, growing on the black land, two miles east of town, and one mile from where the Famous Austin Dewberry originated. I set 42 of these plants in the winter of 1920 on my sandy land. A fine growth in 1921 gave me 15 gallons of fine berries on the 42 plants, in 1922, and in 1924 I gathered 35 gallons of fine berries from these plants. This berry had been bearing fine berries in the same spot for possibly 40 years, and it is thought that the seed might have come from Tennessee as it has the old time sweet flavor that they had in the old fields in the old States. This berry bears on its own merits and needs no fertilizing from any other. Grows on both black and sandy land and will thrive where any other berry will; is a nice sized berry and a glossy jet black, the least bit flattish on both sides and is very sweet. The growth of the plant is similar to the Dallas berry, only a little straighter up with the second year growth.

I have just a few hundred of these plants to offer my trade this season at \$1.50 per dozen or \$10.00 per hundred. You will never be sorry if you set a few of these plants,

J. E. Price,

Pilot Point, Texas.

Pilot Point Dewberry Farm and Nursery

Is located in Pilot Point, on some of the finest sandy soil in Texas to grow nursery stock on, and the above photograph is a specimen of paper shell pecans grown on my farm. Pecan trees are worthless without good latteral root system. After having nearly 20 years experience in nursery business I propose to compare Pecan root System with any man in Texas. This picture shows an honest fair average sample of the pecan trees I grow. One order of trees will convince you. I am a charter member of the Southwest Nursery Association, and refer to any bank or business firm in my town.
